

MSCA Postdoctoral Fellowship Proposal Course

Refine and improve your fellowship proposal

May 5th | ONLINE, LIVE

Cost: 175-200 EUR

About the Course

This one-day training provides early-career researchers with the information they need to write grant proposals for Marie Skłodowska-Curie Actions (MSCA) Postdoctoral Fellowships. By participating in this course, you will be empowered to emphasise the originality and excellence of your research ideas and how your ideas will achieve impact. You will come to know that writing a successful proposal requires a clear assessment of the research funders requirements and engaging with partners in your research institution. Finally, you will learn to assess your work from the perspective of an evaluator and increase the success of your research proposals.

About the Facilitator

Dr. Brian Cahill works at the Leibniz Information Centre for Science and Technology as Grant Manager of the COST Action CA19117 on Researcher Mental Health. Additionally, Brian is a Member of the Governing Board of EuroScience and was previously Chair of the Marie Curie Alumni Association. He was a Marie Curie fellow with research interests focused on measurement techniques for droplet-based microfluidics. Currently, Brian acts as an evaluator of MSCA Individual Fellowships and other funding calls.
