Probabilità di esposizione al contagio COVID 19

Il virus è caratterizzato da una elevata contagiosità. Il SARS-CoV-2 è un virus respiratorio che si diffonde principalmente attraverso il contatto con le goccioline del respiro espulse dalle persone infette ad esempio tramite:

- la saliva, tossendo, starnutendo o anche solo parlando;
- contatti diretti personali;
- le mani, ad esempio toccando con le mani contaminate bocca, naso o occhi.

Le persone contagiate sono la causa più frequente di diffusione del virus. L'OMS considera non frequente l'infezione da nuovo coronavirus prima che si sviluppino sintomi, seppure sono numerose le osservazioni di trasmissione del contagio avvenuti nei due giorni precedenti la comparsa di sintomi.

Il periodo di incubazione varia tra 2 e 12 giorni; 14 giorni rappresentano il limite massimo di precauzione.

Nei luoghi di lavoro, non sanitari, la probabilità di contagio, in presenza di persone contagiate, aumenta con i contatti tra i lavoratori che sono fortemente correlati a parametri di prossimità e aggregazione associati all'organizzazione dei luoghi e delle attività lavorative (ambienti, organizzazione, mansioni e modalità di lavoro, ecc.).

Danno

L'infezione da SARS-CoV-2 può causare sintomi lievi come rinite (raffreddore), faringite (mal di gola), tosse e febbre, oppure sintomi più severi quali polmonite, sindrome respiratoria acuta grave (ARDS), insufficienza renale, fino al decesso. Di comune riscontro è la presenza di anosmia (diminuzione/perdita dell'olfatto) e ageusia (diminuzione/perdita del gusto), che sembrano caratterizzare molti quadri clinici.

Classe di rischio

Nel "Documento tecnico sulla possibile rimodulazione delle misure di contenimento del contagio da SARS-CoV-2 nei luoghi di lavoro e strategie di prevenzione" l'INAIL individua per il settore delle costruzioni una classe di rischio BASSO e per gli operai edili una classe di rischio MEDIO-BASSO.

Misure di prevenzione, protezione ed organizzazione

In considerazione degli elementi di rischio individuati, nel presente documento si descrivono le misure di prevenzione, protezione ed organizzazione, messe in atto al fine di garantire un adeguato livello di protezione per il personale impegnato in cantiere sulla base di quanto contenuto nel:

- "Protocollo condiviso di regolamentazione per il contenimento della diffusione del COVID-19 nei cantieri" del 24 aprile 2020, allegato, in ultimo, al DPCM 2 marzo 2021;
- "Protocollo condiviso di aggiornamento delle misure per il contrasto e il contenimento della diffusione del virus SARS-CoV-2/COVID-19 negli ambienti di lavoro" del 6 aprile 2021, allegato all'Ord. Min. Salute del 21 maggio 2021;
- D.L. 21 settembre 2021, n. 127, "Misure urgenti per assicurare lo svolgimento in sicurezza del lavoro pubblico e privato mediante l'estensione dell'ambito applicativo della certificazione verde COVID-19 e il rafforzamento del sistema di screening";
- D.L. 8 ottobre 2021, n. 139, "Disposizioni urgenti per l'accesso alle attività culturali, sportive e ricreative, nonché per l'organizzazione di pubbliche amministrazioni e in materia di protezione dei dati personali;
- DPCM 12 ottobre 2021 "Modifiche al decreto del Presidente del Consiglio dei ministri 17 giugno 2021, recante: «Disposizioni attuative dell'articolo 9, comma 10, del decreto-legge 22 aprile 2021, n. 52, recante "Misure urgenti per la graduale ripresa delle attività economiche e sociali nel rispetto delle esigenze di contenimento della diffusione dell'epidemia da COVID-19".

DESCRIZIONE DEL CONTESTO IN CUI È COLLOCATA L'AREA DEL CANTIERE

(punto 2.1.2, lettera a, punto 2, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

La chiesa di Santa Maria ad Nives si trova nell'area sommitale dell'altura del colle Pianisi, situato a circa 3,7 km a nord - ovest del centro di Sant'Elia a Painisi. La viabilità dell'area e della zona immediatamente a ridosso della stessa è perdonale. Sulla zona in esame, classificata come zona 2 dal punto di vista della pericolosità sismica, vige il vincolo idrogeologico ai sensi del R.D. dicembre 1923, n. 3267.

DESCRIZIONE SINTETICA DELL'OPERA

(punto 2.1.2, lettera a, punto 3, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

L'intervento comprende opere di scavo archeologico e lavori di restauro e consolidamento.

Queste ultime consistono in:

- Rimozione della vegetazione inferiore e superiore;
- Protezione delle creste murarie;
- Cucitura dei paramenti in muratura con fibre di basalto;
- Integrazioni murarie del sacco interno in pietrame irregolare misto a malta;
- Sigillatura profonda dei giunti di malta con altra compatibile con la preesistente;
- Colatura di malta a rifiuto nel sacco interno della muratura;
- Opere provvisorie sostitutive e/o integrative delle strutture messe in luce.

AREA DEL CANTIERE

Individuazione, analisi e valutazione dei rischi concreti

(punto 2.1.2, lettera c, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Scelte progettuali ed organizzative, procedure, misure preventive e protettive

(punto 2.1.2, lettera d, punto 1, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

L'area del cantiere per le sue tipicità orografiche è interamente pedonale e non raggiungibile con mezzi d'opera tradizionale. Si è previsto pertanto l'utilizzo di un impianto di teleferica, a carico dell'impresa esecutrice, sia dal punto di vista dei costi che dell'acquisizione delle autorizzazione di competenza.

CARATTERISTICHE AREA DEL CANTIERE

(punto 2.2.1, lettera a, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Come si evince dalla tavola grafica allegata al presente PSC, l'organizzazione dell'area di cantiere e di tutti i servizi ad essa annessi dovrà tenere conto dell'orografia dei luoghi.

In particolare, al cantiere si accederà attraverso una strada collegata ad un'arteria a percorribilità veicolare. Da tale strada si giunge ad un'area da allestire per il cantiere, organizzata, come in planimetria, con le attrezzature (box mensa e box wc), un punto per il parcheggio di mezzi meccanici (automobili ecc) ed un'area per lo stoccaggio dei materiali.

Il trasporto dei materiali dal punto di stoccaggio all'area di cantiere vera e propria avverrà attraverso un impianto di teleferica, da mettere in opera, come detto, a cura dell'impresa esecutrice dei lavori.

Dal punto di vista dell'assetto idrogeologico l'area, vincolata ai sensi del R.D. 3267 del 30/12/1923, è classificata non a rischio.

FATTORI ESTERNI CHE COMPORTANO RISCHI PER IL CANTIERE

(punto 2.2.1, lettera b, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

L'area oggetto di intervento non presenta particolari rischi. Non sono infatti presenti altri cantieri preesistenti, né viabilità ad alta percorrenza.

L'orografia del territorio costituisce senz'altro un fattore significativo per lo svolgimento dei lavori, per l'approvvigionamento dei materiali. Significativo è inoltre anche il fattore climatico della zona. Difatti il rigido inverno molisano ha reso necessario dividere in due tranches i lavori previsti, per consentirne la realizzazione prevalentemente nei mesi primaverili ed estivi.

RISCHI CHE LE LAVORAZIONI DI CANTIERE COMPORTANO PER L'AREA CIRCOSTANTE

(punto 2.2.1, lettera c, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Con riferimento alle specifiche lavorazioni previste in progetto, non si ravvisano rischi particolari trasmessi dalle lavorazioni all'area circostante.

Particolari cautele dovranno invece essere osservate per il montaggio e la successiva gestione della teleferica occorrente per il trasporto dei materiali e dei mezzi d'opera.

Dovranno essere rispettate tutte le prescrizioni riguardanti l'installazione del suddetto impianto, tenendo conto di possibili interferenze con linee elettriche ecc.

Il montaggio dovrà essere fatto da personale specializzato. Dovrà inoltre essere opportunamente delimitato, con segnaletica, il percorso a terra della teleferica (quando questa è in movimento aereo), secondo le prescrizioni di legge.

DESCRIZIONE CARATTERISTICHE IDROGEOLOGICHE

(punto 2.1.4, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Dal punto di vista dell'assetto idrogeologico l'area, vincolata ai sensi del R.D. 3267 del 30/12/1923, è classificata non a rischio.

ORGANIZZAZIONE DEL CANTIERE

Individuazione, analisi e valutazione dei rischi concreti

(punto 2.1.2, lettera c, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Scelte progettuali ed organizzative, procedure, misure preventive e protettive

(punto 2.1.2, lettera d, punto 2, Allegato XV del D.Lgs. 81/2008 e s.m.i.)

Dovranno essere realizzate recinzioni di cantiere sia nell'area di stoccaggio materiali e installazione della teleferica, sia nell'area delle lavorazioni di progetto (ampliamento scavo e interventi di restauro). La viabilità di cantiere, l'ubicazione degli apprestamenti (wc, spogliatoio, mensa) sono indicati nella planimetria di cantiere allegata.

Indicazioni per prevenzione rischio COVID
